

Automotive ESD Protection

AEC-Q101 Qualified ESD Devices for Network Transceivers

AEC-Q101 Qualified

► Key Features

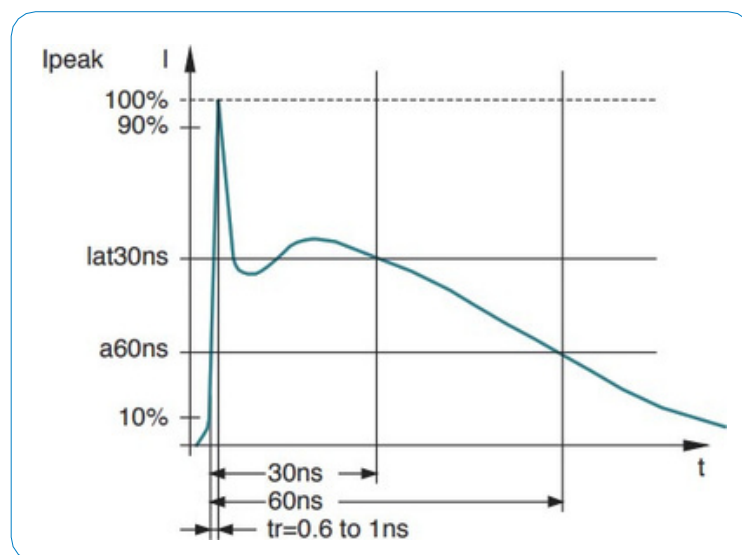

- Bi-directional high ESD robustness up to 30kV
- Excellent ESD clamping behavior
- Low device capacitance
- Package miniaturization
- AEC-Q101 qualified

► Target Applications

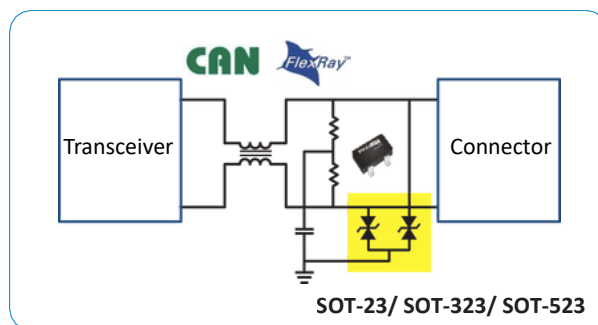

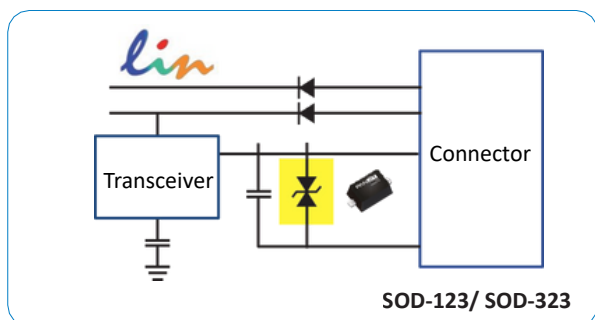

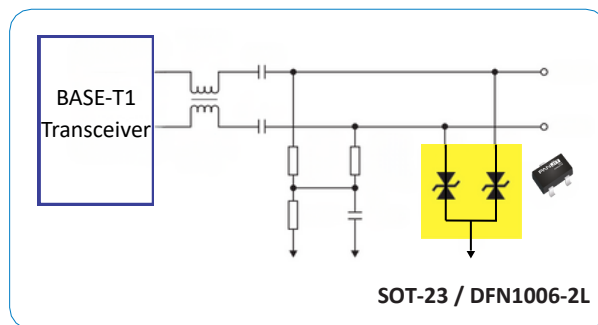

- ECU
- Lighting control
- Passenger seat module
- Instrument panel

► Compliant with ISO 10605

➤ Capacitance matches 20 Kbit/s – 10 Mbit/s
